

# A FRAMEWORK FOR EFFECTIVE TEACHING

**OUR VISION:** *Inspiring Science Learners of the Future*

## HOW DO WE TEACH STUDENTS?

*Staff adapt student-centred approaches to teaching supported by research, including inquiry based learning and experiential teaching. Active student learning opportunities (i.e. 'doing') form the cornerstone of student programs.*

## HOW DO WE ENSURE QUALITY?

*Our students expect and deserve the best. Peer review and client feedback are used to refine program delivery with the aim of achieving best practice.*

## WHAT DOES THIS MEAN FOR STUDENTS?

- *Clear learning goals*
- *Build on their existing knowledge and experiences*
- *Encourages them to ask questions, seek answers and critique claims made by others*
- *Provides opportunities to investigate and draw evidence-based conclusions*
- *Develops higher-order thinking processes*
